Celebrating Trees in Our Community

An African Proverb says "The best time to plant tree is 20 years ago the second best time is now". Trees help many people and things. They provide many things for people and animals. Trees help people in many different ways. They help communities in different ways.

Trees are good for the environment. Trees provide food for people and animals. Fruit trees give people and animals apples, oranges, bananas, and mangoes. They give us food to eat and juices to drink. They also provide homes for animals like squirrels and birds. Trees also give us wood to build houses and give us paper to write on.

Trees help communities in many different ways. First, trees regulate the temperature in neighborhoods by giving shade. They make unity in the community when people get together and make an area more livable by planting trees and flowers. Trees help save water by absorbing water and releasing it out into the atmosphere and it also helps maintain the rain cycle.

Trees make people happy. It helps people see the changing of the seasons through the tree's leaves. Helps erosion from happening. They give back life and are good investments. It gives back good investment by they don't have to have your air on you can just go under a shady tree.

Trees are very good for people and animals. Trees help many communities and cities. They provide good air for people and animals. As you can see trees are very important for the whole world.
